

# Applied Mathematics Seminar

Dr. Andrew McConvey – VP, Goldman Sachs

**Friday, Oct. 3      1-1:50pm**

MAK A-2-610 (PCS) or [via zoom](#) (request password from ortizron at gvsu dot edu)

## A Mathematician's Experience in Electronic Trading

**Abstract:** In this talk, I will discuss my experience as a quant trader at Goldman Sachs. I will give an overview of my role in the FX electronic trading team and my path from mathematics to a career in quantitative finance. In particular, I will discuss how my experiences as a math major, and then a math PhD student, both did and did not prepare me for the role. No prior knowledge of finance is expected.
